

**24 March 2020
FOR IMMEDIATE RELEASE**

**STATEMENT FROM EQUIPMENT SOURCE, INC.
ABOUT COVID-19 IN ALASKA**

Equipment Source Inc (ESI) remains operational despite “Hunker Down” and “Shelter in Place” Emergency Orders.

ESI provides services and support for critical infrastructure and industries in the State Of Alaska. These industries include but are not limited to public works constructions, airport operations, health care facility operations, utilities, oil and gas, internet and telecommunication facilities. For this reason, ESI will remain fully operational across Alaska to support our customers in this time of need. The Emergency Order specifically exempts businesses providing support for critical infrastructure under section 5.b.

Our Fairbanks and Anchorage branches are open for order out business only. Customers will not be allowed into the building. Call or e-mail us ahead of time and we’ll have your parts pulled and ready for you. We will be taking credit card payment over the phone and we are not accepting cash payments at this time. These measures are being implemented to reduce opportunities for the virus to spread.

In addition, ESI is utilizing thorough sanitation practices, reducing staffing levels and employees are maintaining 6-feet of separation. Employees are required to adhere to social distancing recommendations and ESI is enforcing a mandatory 14-day quarantine period for out of state travel. ESI has also postponed all non-essential business travel.

ESI will continue to monitor the situation and adhere to CDC and government guidelines. Safety and health of our customers and our staff is our top priority.
